
The Raindrop Collector - Bill Nelson

Tabbed by: Twilightcapers

Tuning: EADGBE

+ natural harmonics

From the album And We Fell Into A Dream. You will need to practice natural harmonics to play this one, they can be elusive especially at the 7th fret. I would use both neck and bridge pick-ups to make sure all the harmonics ring out clearly. There is more than one guitar on this recording, but I think all the info you need is there, just loop and improvise.

No chord names this time, it's basically G/D/Bm7 tones but sometimes music theory just isn't necessary - it's a guitar thing!
